EXPERIENCE

### Mini Social Network: VieBook

📅 March 2025 – Ongoing

- Role: Fullstack Developer
- Tech Stack: Laravel, NextJs, MySql, Docker
  - Developed a social media platform tailored for Vietnamese users, focusing on user experience and cultural relevance.
  - Built real-time messaging features using WebSockets and optimized backend APIs with Laravel.
  - Integrated AI modules for content moderation and personalized post recommendations.
  - Containerized the application using Docker to streamline development and ensure consistency across environments.
  - Deployed the frontend on Vercel and backend services on VPS with CI/CD pipelines.
- Outcome: Successfully launched MVP with full authentication, profile system, AI-powered suggestions, and real-time chat.

LIFE PHILOSOPHY

"Do it and get results."

STRENGTHS

Hard-working   Creative

Teamwork   Logical thinking
